

Misys Healthcare Systems Collaborates with Availity for Processing Healthcare Transactions

RALEIGH, N.C. (June 28, 2005) - Misys Healthcare Systems, a leader in healthcare information technology, and Availity, a leading provider of e-health transaction services, have forged a partnership that enables Misys to utilize Availity's services for processing transactions to selected payers.

With the alliance, Misys Healthcare Systems' M. Transaction Services - a national healthcare electronic data interchange (EDI) service provider - will employ Availity as their direct connect to Humana and BlueCross and BlueShield of Florida. M. Transactions Services (www.mtsedi.com), which currently processes more than 420 million electronic transactions per year, uses a combination of direct payer connectivity and intermediary links to connect to more than 830 insurance payers in the United States.

"By utilizing Availity's direct connections with leading payers, our 92,000 physician customers should see immediate value with this partnership," said Keith Hagen, president of M. Transaction Services. "Claims should be more error-free, resulting in lower rejection rates and faster reimbursements for our clients."

"Availity's relationship with Misys should improve provider workflow, reduce administrative costs, and ultimately improve the patient experience," said Julie Klapstein, CEO of Availity. "These outcomes are the foundation for Availity's existence."

The agreement between Misys Healthcare Systems' M. Transaction Services and Availity covers a variety of claims management services including claims processing, automated payment posting and eligibility checking. Details of the agreement were not disclosed.

About Misys Healthcare Systems

Misys Healthcare Systems (FTSE: MSY), one of the top five healthcare IT companies in North America, develops and supports reliable, easy-to-use software and services of exceptional quality that enable physicians and caregivers to more easily manage the complexities of healthcare. With 25 years of industry experience, Misys currently serves more than 92,000 physicians in 18,000 practice locations, 1,250 hospitals, 600 home care providers and hundreds of commercial laboratories, clinics, managed services and other related organizations. Misys' family of leading clinical products and Web-based technologies - Misys Optimum™ solutions - are designed from the ground up to share patient data across all medical care settings. Misys Optimum connects community-based physicians and caregivers to the acute care enterprise, enabling increased efficiencies, better decision-making and improved hospital-physician relations.
